The figure consists of eight horizontal bars, each representing a different degree distribution. The y-axis is labeled with 'Degree' followed by a number from 1 to 8. Each bar is composed of small black circles arranged in a grid pattern. The length of each bar corresponds to the count of nodes with that specific degree. The bars show a clear trend: as the degree value increases, the total count of nodes decreases. For example, at Degree 1, there are approximately 1000 nodes, while at Degree 8, there are fewer than 100.
